EVENTS	NAME: Clearly Mark Ring In Pilot	MAAA Number	Frequency	Here provide: model, engine, motor/battery details, etc.
R/C Combat				
Helicopter Hover & Times Task				
Scale Aerobatics				
Thermal Glider				
Bomb Drop				
Fun Scale				
Electric Glider				
Old Timer Duration				
Sports Limbo				
Musical Landings				
t				

36 MHz: A standard 'two-inch keyboard' will be used. Standard two-inch frequency keys with your name & frequency printed on it are to be used. Keys for the 2.4 board need name only. Where models will be flying in an event requiring all to be flown together (check with the '10 events for 2017' description of events) any frequency clashes will be decided by the date entries are received (first-in, best-dressed). For your own convenience, enter early to avoid having to change to a 'to be advised' unused frequency for your event. Radios must be certified to the actual frequency used for an event.

**For an entry to be accepted in the order it is received, 36 MHz frequencies must be stated IN FULL eg: 36.330 and not any kind of abbreviation. MAAA- approved 2.4 GHz is ok.**

Team managers: please make sure your contestants are at the field at the right times, on the right day (!!!) and that all team-members agree to adhere to the spirit of the rules.

Please send your Team's entry to the VMAA's Contest Director Joe Finocchiaro,

Mobile 0418 878 168, e-mail: [contestdirector@vmaa.com.au](mailto:contestdirector@vmaa.com.au)
